

1SEK/ME 2 WIRE VIDEO DOOR PHONE KIT - 1SEK/ME

Two-ways video intercom kit based on 2 wires, not polarized technology. LCD-TFT white monitor 7" sized, hands free with touch screen feature and soft touch buttons delivers good audio quality and very user friendly operation. The monitor and system programming can be done by multi language OSD menu with icons which allows also to program date and time, select call chime for door bell, external call and intercommunication among different tones and choose different volumes for the call ring during night and day. Moreover the system can automatically record a picture of the caller or, adding an optional SD card, a 10 seconds video footage. The external station is robust and compact, only 90mm wide: special care has been put on the design to get a modern appeal and good protection against water; it is suitable for surface mounting and the name plate is even white back lighted. It can also drive up to 1 DC or AC door lock (a second door lock can be activated by SER01). The system power supply is a DIN rail type (included).

MAIN CHARACTERISTICS

material: **Zinc alloy**

mounting:
wall mounting: **Surface**

colour: **White monitor**

hand-free: **Yes**

display: **7"**

button number: **1**

vision angle: **110°**

FUNCTIONS

video memory: **Yes**
